"Preparing Learners for Tomorrow's Challenges"

Why?

Google

We have considered and planned for the implementation of 1:1. It is part of our strategic plan because we know technology can assist in meeting the rigor of the new Indiana Academic Content Standards. Chromebooks will allow our teachers and students to be creative, engaged, and prepared for demands of the future. We want our students to have every opportunity possible to be successful adults.

No Textbooks?

We will still continue with new textbook adoption where it makes sense instructionally. If there is a viable digital option in the future we will look to that option once we can ensure 1:1 access for all students.
